CHRISTIAN GERARD HIZON

FLUTTER DEVELOPER / MOBILE DEVELOPER

Address: Talisay City, Neg Occ, Philippines 6115
Phone: +63 998 303 2084
Email: christiangerardhizon@gmail.com
Linkedin: https://www.linkedin.com/in/christiangerardhizon
Portfolio: www.christianhizon.hznsystems.com

Adaptive Mobile Developer with over **8 years of experience** and a specialization in the **Flutter**, **Dart**, and **Ionic** ecosystems. I have a proven track record of architectural agility, frequently stepping into projects with little-to-no prior knowledge of a specific framework such as **Flutter** or **Shopify**, and rapidly teaching myself the tools necessary to deliver high-performance MVPs and enterprise solutions.

Beyond core mobile development, I am a technical mentor and public speaker who excels at bridging complex backend logic (**Firebase, REST APIs**) with seamless, responsive user experiences. Whether building internal productivity tools like a Time Management tool from scratch or leading the transition to Flutter for entire development teams, I prioritize performance optimization and rapid, self-directed problem-solving.

TECHNICAL SKILLS

MOBILE DEVELOPMENT
- Flutter
- Dart
- Riverpod
- Ionic Framework

WEB DEVELOPMENT
- Angular
- JavaScript
- Node.js

BACKEND & APIs
- Firebase
- Pocket Base
- REST APIs

ECOMMERCE PLATFORMS
- Shopify
- nopCommerce
- Opencart

WORK EXPERIENCE

Mobile and Web Developer — **March 2022 - Present**
2doIT

Responsibilities:

- Enhanced the frontend of nopCommerce websites by implementing responsive design and optimizing performance.
- Developed and implemented responsive design strategies for the SecPro project to cater to end-user needs across various screen sizes.
- Applied best practices for optimizing website performance to ensure a seamless and high-quality user experience.
- Designed and built the e-Timer time tracker tool from scratch to track work logs and manage project orders.
- Managed the end-to-end development of internal tools, focusing on refining features for improved productivity and workflow tracking.

Achievements:

- **From-Scratch Development:** Successfully launched e-Timer, an internal productivity tool built entirely with Flutter and REST APIs to oversee project progress.
- **Performance Optimization:** Significantly improved user retention by implementing high-responsiveness strategies for the SecPro project.

Wobile Developer **Sept 2020 - Nov 2022**
Code Active

Responsibilities:

- Managed the project-based development of both mobile applications and accompanying websites.
- Utilized Ionic Framework and Firebase as a backend to build service-oriented mobile and web platforms.
- Developed online scheduling solutions from the MVP stage through to deployment.
- Maintained full-stack responsibility for mobile and web platforms using Flutter and Firebase.

Achievements:

- **MVP Launch:** Successfully developed and launched the GoSwoof online scheduling app MVP for both mobile and web platforms using Flutter.
- **Platform Delivery:** Created the Match A Service mobile and web platform, effectively connecting users with skilled workers for construction and renovation projects.
- **Advanced Troubleshooting & Community Contribution:** Leveraged existing Ionic knowledge to navigate a critical technical blocker that lacked online documentation; successfully resolved the issue through persistent trial and error and strategic version downgrading, later publishing the solution on GitHub to assist the global developer community.

Software Developer **Aug 2018 - Nov 2022**
Stratium Software Groups, Inc.

Responsibilities:

- Created and maintained various websites using Angular, Shopify, and Opencart.
- Developed custom layouts, integrated plugins, and managed content updates for the Trude Lizares e-commerce site.
- Built the School SOS System using Flutter, Firebase, and Angular to keep users informed of emergency events.

Achievements:

- **Technical Pioneer:** Taught himself the Flutter framework and successfully trained co-workers on the technology to establish the company's mobile development capabilities.
- **Workflow Optimization:** Optimized manual client processes by building the JuanRide ordering system using Angular and Shopify.

Intern to Mobile Developer **Feb 2018 - Aug 2018**
HYbrain

Responsibilities:

- Collaborated with other developers to design and deploy software solutions.
- Developed the MECO mobile app, featuring an Information Board and Appointment Schedule system.
- Built the Safe Spaces PH mobile app using Ionic and Firebase as a location finder for organization partners.

Achievements:

- **Rapid Skill Acquisition:** Independently taught himself Ionic, Angular, and Firebase during his internship, leading to a successful transition to a full-time role.

SPEAKING & MENTORSHIP

Introduction to Flutter Speaker | Google Developer Group, BCD (2019)

- Invited to present as a subject matter expert on Flutter development for the local developer community.

Capstone Internship Mentor | University of Saint LaSalle, BCD (February – March 2021)

- Provided technical guidance and mentorship to graduating IT students during their final capstone projects.

Ionic Framework Speaker | STI West Negros University, BCD (February 2019)

- Delivered a technical session on Ionic Framework development to university students and faculty.

PERSONAL PROJECTS

I have developed custom, full-stack systems for local businesses using **Flutter** to replace manual, paper-based operations with high-performance digital workflows

Sann Jose' Animal Clinic Management System

- Developed a web-based platform to modernize a local veterinary clinic, digitizing everything from patient records and treatment plans to inventory management.
- Integrated automated SMS reminders and multi-branch management to improve client retention and operational scaling.
- Built a reporting module and integrated POS billing to track clinical trends, busiest days, and sales patterns.

EBE Gym Management System

- Engineered an end-to-end management solution to automate membership tracking and financial oversight for a local fitness center.
- Implemented RFID-based hardware integration for secure member check-ins and attendance monitoring.
- Developed expired member tracking and a dedicated POS and sales module to manage transactions and automate renewal alerts.

EDUCATION

Bachelor of Science in Information Technology — **2014 - 2018**
University of St. La Salle - Bacolod
Major in Mobile and Web Development
